Project Name: Muse

Location: Nigdi – Pradhikaran, Pune

Year Built: 2025 August

**Duration of the project: August – December 2024 (Civil changes)
January 2025 – August 2025 (Interior Work)**

Carpet Area (in sq.ft.): 2280 sq.ft.

PROJECT DESCRIPTION:

Muse- Inspired by her strength, designed in timeless grace. This home reflects a woman who carries quiet strength and timeless grace- raising her daughters with love, resilience, and unwavering elegance.

This project is an exploration of modern luxury, shaped by a clear focus on comfort, openness, and everyday functionality. Our design approach was rooted in simplicity—creating a home that feels spacious yet warm, and elegant without being overwhelming. Each space has been carefully planned to flow naturally into the next, balancing practical needs with a calm, refined aesthetic to create a home that is both inviting and timeless.

We started with 2 separate 3 BHK apartments and creatively combined into one spacious and cohesive 3.5 BHK home. The goal was to create a larger, more comfortable living space without making major structural changes. By keeping most of the existing framework intact and making only minimal adjustments to the walls, our design focused on smart planning. This approach allowed the spaces to connect naturally, resulting in a home that feels open, functional, and easy to move through.

The main living area is connected to kitchen and family room to form an open, easy-flowing social space, making circulation effortless. At the same time, the private zones are more secluded, ensuring a clear and comfortable transition from shared to personal spaces.

A key highlight of the home is its connection to natural light and views. The living room opens up to beautiful sunset views, filling the space with warm tones in the evenings. In contrast, the bedrooms are designed to receive soft morning light and fresh airs, creating a calm and

refreshing start to the day. The play of light brings a pleasant and ever-changing feel to the home throughout the day.

Each bedroom has been bespoke designed to reflect the client's lifestyle, preferences, and global exposure. Inspired by their travels, the interiors embody a European aesthetic, expressed through refined material palettes, elegant detailing, and a balance of classic and contemporary elements. This design does not replicate European style—it interprets it through a personalized lens, making the home both aspirational and intimate.

Moments of drama and storytelling are interwoven within the circulation spaces. A standout feature is the passage gallery wall, adorned with curated family photographs and accentuated by track lighting, transforming a transitional space into an emotive visual experience.

This project is a testament to how constraints can inspire creativity, resulting in a home that is not only spatially efficient but emotionally resonant. By blending architectural sensitivity with personalized design, the residence stands as a harmonious fusion of structure, lifestyle, and refined European elegance.
